

Afghanistan community radio stations

Estimated reach and broadcast languages

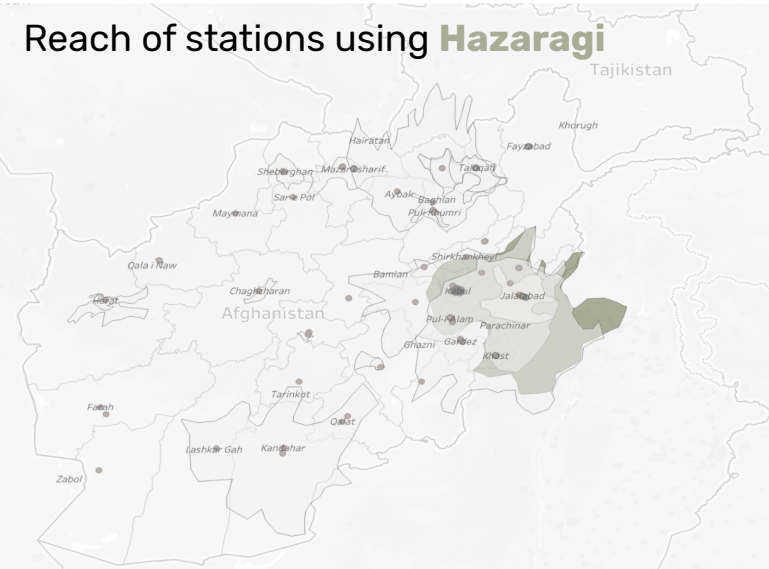

Reach of stations using **Dari**

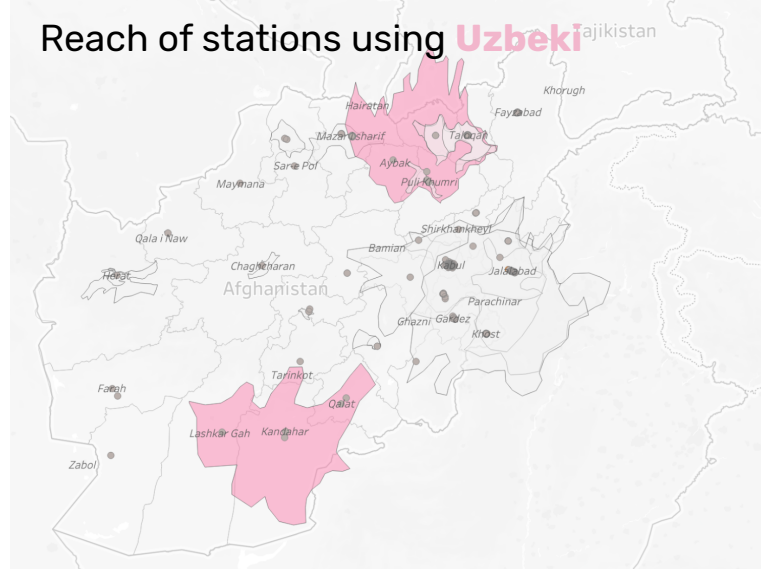

Reach of stations using **Pashto**

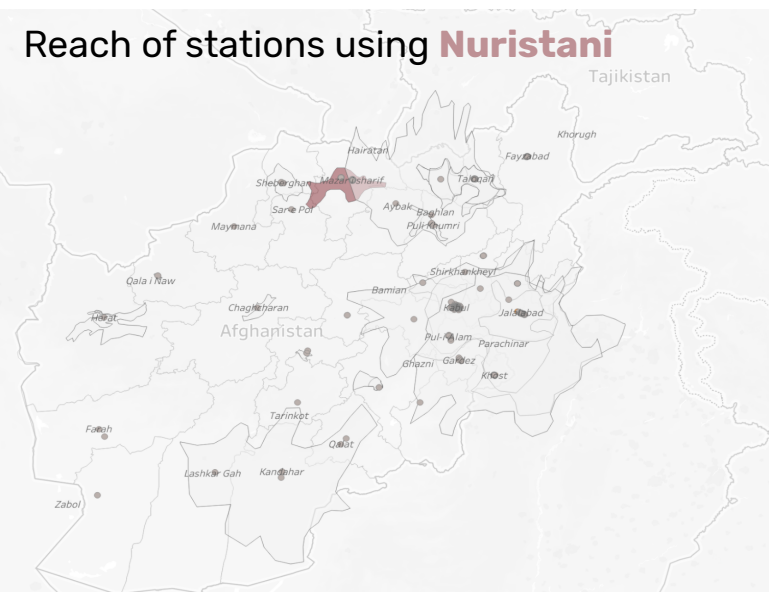

Reach of stations using **Hazaragi**

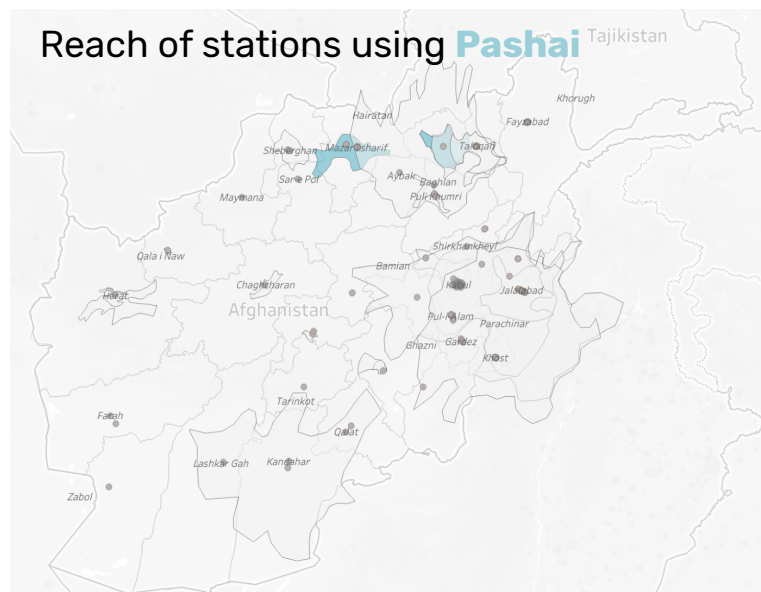

Reach of stations using **Uzbeki**

Reach of stations using **Nuristani**

Reach of stations using **Pashai**

Language of broadcast was self-reported through an online survey conducted with community radio stations throughout Afghanistan. Each polygon represents the approximate area that can receive that particular broadcast. These polygons were estimated using self-reported tower height and transmitter strength figures, combined with a digital elevation model to produce line of sight area estimates.

Translators without Borders. March 2021.
